RDK Remote Logan

Slim and Smart

The Logan brings you a truly advanced TV experience customized for RDK.

In a well-balanced, clean and clear design, it allows you to easily to control all functions of the RDK Platform. Improving engagement with seamless user experiences. Creating the perfect interaction between software, hardware and the user. A clear focus towards the main navigation island in an overall rounded shape that sits perfectly in the hand.

Options include full backlighting, ambient light sensor and proximity sensor to control the lighting in a smart way.
