# Nevo Butler

Enhanced Entertainment Experience

The Nevo Platform

The Nevo Platform is the white label end-to-end smart home and entertainment control solution from UEI. It consists of our QuickSet Cloud, nevo.ai, services, gateways, widgets and devices that seamlessly work together as one system.

Cloud	Assistant	Services	Gateways	Widgets	Devices

Nevo Butler

The Nevo Platform can run on virtually any internet connected OEM device but presents itself in its purest form on our highly secured, voice-enabled, white label gateway Nevo Butler.

The Gateway

UNIVERSAL ELECTRONICS®

Entertainment and Smart Home Hub

- Secured and managed hardware

Complete white label end-to-end smart home and entertainment control solution

UNIVERSAL ELECTRONICS

Voice-Powered Content Control

Nevo Butler enables a branded assistant for video service providers to offer far-field voice control of current installed base of entertainment systems in the home.

It is compatible without a software change needed in the set-top box, making it an efficient solution for bringing voice discovery and control to these households.

Does not require an accessory or a software change and is not limited to IP connected set-top boxes or TVs.

The Nevo platform

Complete Universal Control

Made possible via the following interfaces:

- Infrared

- Zigbee R4FCE

- IP control

- Zigbee

Enabling complete coverage of installed base and entertainment viewing

Intelligent sound events for context aware services i.e. increase volume by certain percentage and audio ducking

The Nevo platform

COMPATIBILITY WITH DEVICES AT HOME IS
THE NUMBER ONE DRIVER FOR PRODUCT PURCHASES

- Addresses both consumers' needs as well as manufacturers' challenges as a service

- Ensures the product is compatible with ecosystems and devices in the home including hubs, smart speakers and automation platforms as well as those Powered by QuickSet
